EXPERIENCE

Software Developer

SIA Fintecor

08/2024 - 11/2025 Riga, Latvia

Innovative fintech software developers

- Led migration of the front-end build system from Create-React-App/Webpack to Vite 6.2, cutting production build time by 68% (19.5 s → 6.3 s)
- Re-structured 250 + React modules into a Feature-Sliced architecture, cutting coupling and speeding developer navigation & parallel work
- Enhanced Java / Spring Boot REST services (client-bank, auth, back-office): resolved critical bugs in payments, signing, and client-admin messaging, integrated Guru Pay and core-bank APIs, added smart sign-method detection, and containerised the stack for fast CI/CD deploys

Frontend Developer

SIA G-2

08/2023 - 08/2024 Riga, Latvia

A company providing compliance and anti-money laundering software solutions

- Reduced backend load by {40%} by implementing client-side PDF generation for AML reports.
- Built an interactive KYB corporate-structure visualiser with React Flow that maps multi-tier shareholder relationships on demand, giving compliance teams a clear, single-screen view.
- Delivered 10 multistep affiliate landing pages in just 2 weeks, establishing a rapid-delivery 'assembly-line' process for future marketing sites.

Junior Frontend Developer

SIA Intexsys

10/2022 - 09/2023 Riga, Latvia

A prominent e-commerce platform with high traffic and significant revenue

- Supported a high-traffic commerce platform (4 M visits/month, €500 M revenue 2022) in a 7-person cross-functional squad (FE+BE devs, QA, PO, PM)
- Diagnosed and fixed customer-facing UI bugs across HTML, LESS, JavaScript/jQuery, Twig, and React, keeping the production defect backlog low and safeguarding key conversion paths
- Participated fully in Scrum ceremonies—daily stand-ups, sprint planning, reviews, and retrospectives—contributing estimates, demoing fixes, and learning Agile delivery best practices

SUMMARY

I am a frontend developer with over 3 years of experience specializing in React and Next.js. I have a strong background in developing effective and scalable applications in the Fintech space. My skill set includes full-stack development with Node.js and Spring Boot, and I am dedicated to writing clean code and creating intuitive user experiences.

EDUCATION

Bachelor of Science in Computer Engineering

Riga Technical University

09/2020 - 06/2024 Riga, Latvia
